erwinlatif@gmail.com
Kudus, Jawa Tengah

SUMMARY

Highly motivated CyberArk Engineer and Team Lead with hands-on experience in delivering enterprise CyberArk deployment and implementation projects, leading technical support teams, and managing mission-critical Privileged Access Management (PAM) environments. CyberArk Sentry, Defender, and Certified Delivery Engineer (CDE) certified, with proven expertise in troubleshooting complex technical issues, implementing secure CyberArk solutions, and collaborating with cross-functional teams to deliver successful customer outcomes. Passionate about cybersecurity and committed to driving operational excellence, enhancing security posture, and contributing to organizational growth through technical leadership and customer-focused solutions.

EXPERIENCE

10/2023 - Present

Team Lead of CyberArk PAM Engineer

OneSecure Asia ↗

- Led a team of support engineers by managing shift schedules, allocating resources, and ensuring optimal team coverage to meet service level agreements (SLAs).
- Coordinated team workload, prioritized incidents, and served as the primary technical escalation point for complex CyberArk issues.
- Planned, coordinated, and executed CyberArk deployment and implementation projects, ensuring successful delivery within project timelines, scope, and customer requirements.
- Mentored and coached team members through technical guidance, knowledge sharing, and performance support to improve team capability and service quality.
- Provided efficient technical support to enterprise clients by troubleshooting and resolving complex CyberArk Enterprise issues, ensuring minimal downtime and optimal system performance.
- Collaborated with cross-functional teams to design, implement, and maintain CyberArk solutions in accordance with industry best practices and security standards.
- Performed in-depth system analysis and root cause investigations to identify vulnerabilities within customer IT infrastructures, recommending and implementing appropriate CyberArk security controls to mitigate risks.
- Analyzed customer-specific business requirements and technical challenges through comprehensive research, issue replication, and systematic troubleshooting, leveraging extensive CyberArk product expertise.
- Documented technical issues, solutions, and best practices while developing and reviewing knowledge base articles for both internal teams and customer-facing platforms.
- Worked closely with global support, security services, sales, operations, and engineering teams to ensure customer success and continuous service improvement.

06/2022 - 06/2023

CyberArk Enterprise Support Engineer

CyberArk - Solugenix ↗

- Provided efficient technical support to clients by troubleshooting and resolving complex CyberArk Enterprise issues, ensuring minimal downtime and maximum system functionality.
- Collaborated with cross-functional teams to design, implement, and maintain CyberArk solutions, adhering to best practices and industry standards.
- Conducted thorough system analysis and diagnosis to identify client IT infrastructure vulnerabilities, recommending appropriate CyberArk security measures to mitigate risks.
- Analyzing customer-specific business requirements and technical challenges through

comprehensive research, meticulous replication, and systematic troubleshooting while leveraging a deep reservoir of acquired expertise.
- Documenting all technical inquiries. Develop and review content for knowledge sharing for both internal purposes and customer-facing platforms.
- Working directly with other global support colleagues, security services, sales, operations, and administration to ensure the long-term success of our customers and the company
